

ADAARAN

MALDIVES

REPUBLIC OF MALDIVES

Maldives – One of the most Environmental Sensitive destinations in the world is vulnerable to all types of human activities.

Building Tourist facilities, Operating Tourist Resorts, Travel and Transportation, Recreation and Entertainment are all part of such activities.

Adaaran Resorts - One of the pioneer Resort Operators in the Maldives is conscious of the impacts of their business on Environment and therefore, formulates its policies and procedures to minimise the impacts on Environment of Maldives focusing on the long term sustainability of the Island Nation.

Badhiya Gunatilake
Chief Operating Officer -
Adaaran Resorts – Maldives
9th January 2017

We are committed to reduce our carbon foot print by reducing non renewable energy usage and promoting reforestation of the islands.

Conservation of water in the resort activities is implemented resort wide, by introducing new technology and through awareness programs.

Waste water of the resorts is treated and recycled into the system and water pollution is minimised by using biodegradable chemicals in the resort activities.

We practice 7 R policy with regard to waste minimisation & Reject, Reduce, Reuse, Reclaim, Repair, Replace, recycle is the norm.

Flora & fauna of the islands and ocean is the main attraction for tourist, which are protected and nurtured.

Hazardous waste which is harmful to the island environment is minimised and managed scientifically in order to preserve the natural environment.

We will provide gainful employment opportunities to local community and source their produce wherever possible in order to uplift the local economy.

Fundamental rights of all employees and nearby communities will be safeguarded against any discrimination.

We Care for the Health & Safety of our guest & associates by analysing the risks, making aware, mitigating them and through constant follow-up.

We are a family oriented resort chain where fundamental rights of the children are safeguarded and protected against any abuse.

We are committed to purchase all items with less environmental impacts in their manufacture, Transportation, Usage & disposal.

We will abide by all relevant laws and legislations of the country where we operate.

All above activities will be periodically monitored, recorded and benchmarked against industry best practices.
